Learning Journey
Mathematics - Key Stage 3

Further geometry
Pythagoras' theorem & Trigonometry

Probability
Combined events & Venn diagrams

Further algebra
Inequalities, quadratic graphs

9

Reasoning with number
Indices, proportion, standard form

Reasoning with algebra
Linear graphs, sequence rules

Reasoning with geometry
Transformations

Algebraic techniques 2
Rearranging formulae, equivalence

Applications with number
Financial contexts, compound interest

Probability
Chance, outcomes

Statistics
Analysing data

Algebraic techniques 2
Equations, brackets

Developing geometry
Angles, area & perimeter

Developing number
Ratio, multiply & divide fractions

Constructing in 2D and 3D
Working with 2D and 3D shapes, accurate constructions using mathematical equipment

8

Algebraic techniques
Multiply & divide like terms, laws of indices

Statistics
Collecting & representing data

Reasoning with number
Primes and indices, rounding

Fractions
Add & subtract, decimal/percentage equivalence

Algebraic thinking

Percentages
Fractions/percentages of amounts

7

Angle geometry
Measuring, notation, basic angle rules

Number Skills
Place value, four operations, directed numbers
